

Food Safety Guidelines *for Temporary Food Events*

Preparation

Use a simple menu. Use a simple menu; they are safer and easier to prepare. Only use food from approved sources. Food must be prepared or stored in a commercial commissary kitchen.

Pre-wash all produce. All produce must be washed at an approved commissary in a food prep sink or be received pre-washed (i.e. lemons for lemonade, potatoes for fries, or apples for caramel apples).

Keep foods cold during transport. Cold foods must be transported and held in approved units capable of maintaining foods at less than 41°F. Only smooth, easily cleanable, non-absorbent ice coolers or approved food-grade containers may be used for the storage of food, ice, or drinks. Containers or coolers made from Styrofoam may not be used.

Cool all foods at the commissary. Foods cooked at the commissary and then cooled must be rapidly cooled from 135°F to 70°F within 2 hours, then to 41°F within an additional 4 hours. Food prepared at room temperature must be cooled to 41°F within 4 hours in a 2-4" deep container uncovered in refrigeration; in an ice bath (stirring often), in an ice bath with an ice paddle; or in refrigeration.

Store all food, utensils, equipment away from contamination. Food, utensils, equipment, and single-use items must be protected from dust, insects, customers, and other contamination while being transported, stored, used, and/or served. All food, paper products, and utensils must be stored at least 6" above the ground. Sneeze guards, covers, or other barriers must be provided to protect food from customers and other sources of contamination.

Clean-Up

Use sanitizer solution. Wiping cloths must be used with sanitizer solution and must be stored in the sanitizer between uses. Test kits must be provided and used. Sanitizer concentration requirements are as follows: Chlorine (bleach): 50-200 ppm / Quaternary ammonium: 200 ppm or as per label.

Do not wash dishes on-site. On-site washing in tubs/basins or 3-compartment sinks is not allowed. Extra serving utensils must be provided so that soiled utensils can be changed every four (4) hours.

Store and dispose of wastewater properly. All liquid waste, except drainage from clean potable ice, must be stored in a properly sized retention tank and be discharged into an approved wastewater disposal system.

Collect and dispose of garbage properly. Any solid waste, such as food debris or waste paper, must be collected and disposed of at an approved commercial establishment. A clean trash receptacle must be provided in the food booth.

Food Service

Check cooking temperatures. Use a digital food thermometer to check cooking temperatures. Measure the temperature in the thickest part of the food. Cook hamburgers and ground beef to at least 155°F, chicken or other poultry to 165°, and pork to 145°. After the food is cooked, it must be kept hot at 135° or more until it is served. If you're serving potentially hazardous foods you must have an accurate, probe-type, digital food thermometer on-site at all times during the event.

Reheat to 165°F. Any foods being reheated must reach 165°F within 30 minutes. Do not attempt to reheat any food in a crock-pot, chafing dish, or other hot-holding device; they take too long to reheat food, giving bacteria a chance to grow.

Keep cool foods at 41°F or less. Cold perishable foods must be kept at 41°F or less at all times.

Wash hands in running water. Handwashing facilities with running potable water, liquid soap, and paper towels must be provided. You may use a portable water source that allows both hands to be placed in a stream of water simultaneously, such as a container with a pullout waterspout or a Cambro-type container and a catch basin for the dirty water.

Do not touch ready-to-eat foods with bare hands. Workers may not touch ready-to-eat foods or food contact surfaces with their bare hands. Use disposable gloves, tongs, napkins, or other tools to handle food. Keep food covered at all times to protect it from insects, dust, etc. Condiments must be served from pre-approved covered containers. Animals are not allowed inside the booth.

Send sick workers home. Only healthy workers may prepare food. Anyone showing signs of illness, such as coughing, sneezing, diarrhea, vomiting, fever, etc. is not allowed in the booth. Workers must wear clean clothes. No smoking is allowed in the booth.

Use potable water only. Potable water must be available and used. A food-grade hose must be used when connecting to a potable water supply.
